

TORO[®]

Reversing Secondary Belt Cleaner

The **Tru-Trac TORO** secondary belt cleaner is an effective flexible secondary belt cleaner that is also suitable for reversing conveyor belts. The cartridge blade system allows for easy blade change-outs.

Blade cartridge for easy blade change out.

- **Complete Cleaning** - the segmented 150mm Tungsten Carbide cleaning blades that are independently tensioned by its own rubber cushion to maintain a consistent blade-to-belt pressure.
- **Blade Cartridge** - allows for easy change out of scraper blades from either side of the conveyor.
- **Designed for Reversing Conveyors** - such as shuttles or conveyors that roll back, trippers, due to its unique two-way rubber cushions.
- **Tensioned** - by the Bolt-up tensioner for constant blade pressure, reducing blade re-tensioning maintenance and ensuring high cleaning efficiency throughout the life of the blade.

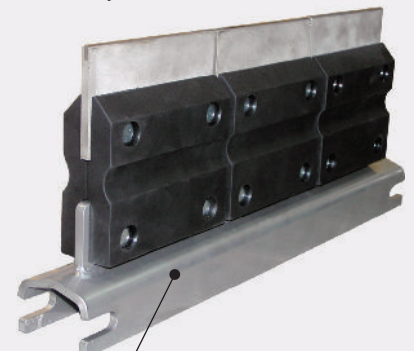

TORO C-TIP
(Mechanical and/or
Vulcanized Spliced Belts)

Tru-Trac Toro secondary belt cleaner installed on the primary belt off the main crusher.

Blade Cartridge allows for easy change out of scraper blades from either side of the conveyor.

Blade Cartridge for easy blade change out.

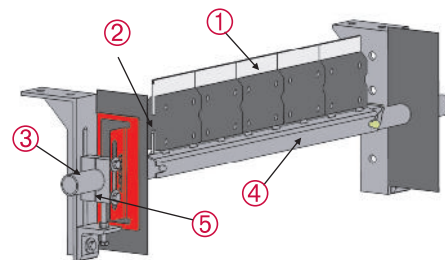

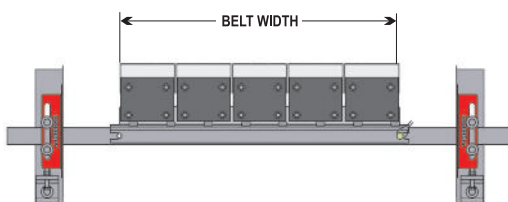

Complete TORO Scraper with Bolt-Up Tensioner
